

## Dr. Mark Causey

**Session Date:** Friday, October 18, 2024

**Session Time:** 10:30 AM – 11:00 AM

**Presentation:** *“How to turn the flash off: Introducing Pre-Loaded, 3D-printed attachments”*

**Synopsis:** Picture a world where the conventional approach to attachments is completely reimaged and pushes the boundaries of bonding efficiency. Thanks to the advancements in new technologies; pre-loaded trays, 3D printed precision attachments, and no adhesive flash are a reality. Join Dr. Causey as he demonstrates a better way to bond attachments.

### Objectives:

- Learn about attachment history and how to simplify your attachment planning.
- Understand how flash can comprise your approach to your treatment plan.
- Discover the benefits of 3D printed attachments and what that could mean for your aligner cases.

### Biography:

Dr. Mark Causey is a Board Certified Orthodontist who practices in Cumming, GA. He owns Causey Orthodontics as well The Alignery. The Alignery focuses specifically on clear aligners and facial esthetics. He is married to his wife of 16 years and they have four children. Dr. Causey graduated dental school at the Medical College of Georgia in 2010 and received his orthodontic certificate from the Medical College of Georgia Department of Orthodontics in 2012. He currently serves as part time faculty in the department of orthodontics at Augusta University as well serves as the dentist for the Atlanta Falcons. He has several publications on digital technology and its uses in orthodontics and enjoys speaking on using basic fundamentals while implementing new technology. He was nationally recognized for his work with 3D printed masks during the pandemic and holds several provisional patents pertaining to 3D printing. He is a member of the AAO, CDABO, GDA, GAO, The Hinman Dental Society and the Rotary Club of Forsyth
